Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A fabric having a thickness of 0.07 mm or less and comprising a

rip stop weave wherein the lip widths of the longitude and latitude thereof are each 5 mm or less wherein the tear strength in the warp cut direction and that in the weft cut direction according to

the pendulum method are each from 10 to 50 N, the weight per square-meter is 50 g/m² or less,

and the air permeability is 1.5 cm³/cm²·s or less, and the yarn linear density is 30 dtex or less, wherein single side calendaring is conducted on the fabric.

wherein single side catendaring is conducted on the faoric.

2. (Original) The fabric according to claim 1, wherein the bending rigidity according to

KES is 0.025 gf·cm²/cm or less.

3. (Previously Presented) The fabric according to claim 1, wherein the thickness is 0.07

mm or less.

4. (Previously Presented) The fabric according to claim 2, wherein the thickness is 0.07

mm or less.

5. (Previously Presented) The fabric according to claim 1, wherein the cover factor is

from 1600 to 2000.

6. (Previously Presented) The fabric according to claim 2, wherein the cover factor is

from 1600 to 2000.

Applicant: Noriki Fukunishi et al. Attorney's Docket No.: 19078-003US1 / F05-053US

Serial No.: 10/565,836 Filed: January 25, 2006

7. (Previously Presented) The fabric according to claim 1, wherein the ratio of the warp density to the weft density is from 0.9 to 1.2.

8. (Previously Presented) The fabric according to claim 2, wherein the ratio of the warp density to the weft density is from 0.9 to 1.2.

9.-10. (Canceled)

- 11. (Previously Presented) The fabric according to claim 1, comprising a polyamide multifilament wherein the fiber fineness is 1.2 dtex or less.
- 12. (Previously Presented) The fabric according to claim 2, comprising a polyamide multifilament wherein the fiber fineness is 1.2 dtex or less.
- 13. (Previously Presented) The fabric according to claim 1, comprising a nylon 6 multifilament wherein the fiber fineness is 1.2 dtex or less.
- 14. (Previously Presented) The fabric according to claim 2, comprising a nylon 6 multifilament wherein the fiber fineness is 1.2 dtex or less.
- 15. (Previously Presented) The fabric according to claim 1, comprising a rip stop weave wherein the lip widths of the longitude and latitude thereof are each 1.5 mm or less.
- 16. (Currently Amended) The fabric according to claims 2.1, comprising a rip stop weave wherein the lip widths of the longitude and latitude of the rip stop weavethereof are each 1.5 mm or less.

17. (Previously Presented) A process for producing the fabric according to claim 1, wherein neither resin finish nor double side calendaring is conducted.

- 18. (Previously Presented) A process for producing the fabric according to claim 2, wherein neither resin finish nor double side calendaring is conducted.
 - 19. (Canceled)
 - 20. (Canceled)
